SUMMARY

Full Stack Developer and Computer Science student with proven experience building and shipping production-grade AI-powered web applications. Developed **PrepVio**, a live SaaS platform integrating AI interview simulation, WebRTC, and real-time analytics - deployed with real-world users. Proficient in the MERN stack, REST APIs, and AI integrations (OpenAI/Gemini).

SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Monaco Editor API, Figma Embeds.
Backend & APIs: Node.js, Express.js, MongoDB, REST APIs, OpenAI API, Gemini API, WebRTC, Socket.io.
Tools: Git, GitHub, VS Code, Postman, Thunder Client, Vercel, Cloudinary.
Concepts: Sentiment Analysis, Adaptive Learning Algorithms, Real-Time Communication, Full-Stack Architecture.

PROJECTS

krishimitra - Full Stack AgriTech Platform

React.js · Node.js · Express.js · MongoDB · Machine Learning (Live Link: <https://krishi-mitra-dng7.onrender.com>)

- Engineered an AI platform recommending optimal crops based on soil, climate, and seasonal data, connecting 50+ farmers directly with wholesalers.
- Implemented i18n localization to support multiple languages, improving accessibility for regional farmers across different language groups.
- Integrated weather forecasting and irrigation analysis APIs with MongoDB-backed data pipelines to power real-time crop recommendations.

PrepVio - AI-Powered Interview & Adaptive Learning SaaS

React.js · Node.js · MongoDB · OpenAI/Gemini API · WebRTC · Socket.io (Live Link: <https://www.prepvio.in>)

- Built an AI-driven interview platform featuring real-time voice/text simulations, a live coding environment, NLP-based performance analytics, confidence scoring, and personalized learning recommendations.
- Developed the backend architecture and APIs using Express.js, MongoDB, supporting real-time interview sessions, user management, and analytics workflows.
- Integrated Speech-to-Text (STT) and Text-to-Speech (TTS) pipelines with AI services to enable interactive voice-based interview simulations.
- Built a browser-based coding environment using Monaco Editor and Judge0 API for real-time code execution, while implementing 3D avatar rendering from Blender assets and payment gateway integration for SaaS subscriptions.

Job Portal - Full Stack Web Application

React.js · Node.js · Express.js · MongoDB (Live Link: <https://job-portal-full-stack-client-chi-black.vercel.app/>)

- Developed a full-stack job portal with JWT-based secure authentication, role-based access for employers and candidates, and real-time application tracking.
- Integrated WebRTC for live recruiter-candidate interaction with a fully responsive, consistent UI/UX across devices.
- Implemented RESTful APIs for job CRUD operations, application management, and user profiles using Express.js and MongoDB.

EDUCATION

B.Tech in Computer Science Engineering

Garden City University, Bangalore · 2023 – Present (Expected 2027) · CGPA: 9.5 / 10 (up to 3rd year)

12th (PUC) - 81.2%

Vidya Bharati Shikshana Kendra, Raichur · 2023

10th (SSLC) - 82.2%

Vidya Bharati Shikshana Kendra, Raichur · 2021

ACHIEVEMENTS & ACTIVITIES

- CGPA 9.5 / 10 through 3rd year of B.Tech, Garden City University.
- Actively solving DSA problems on LeetCode (Easy & Medium) - arrays, strings, hashing, and recursion.
- Participated in **15+ hackathons**, building and presenting working prototypes under time pressure.
